

Aluminum Electrolytic Capacitors SMD Type

Panasonic
INDUSTRY

Elevating Performance through Quality

Panasonic provides a vast selection of Surface Mount Type Aluminum Electrolytic Capacitors featuring high reliability, long life, low ESR and high ripple current. With 30 Series to choose from, there's a Panasonic SMD Lytic Capacitor for any application. Panasonic Aluminum Electrolytic Capacitors offer best-in-class low ESR, large capacitance and miniaturization solutions. Being AEC-Q200 compliant*, they can be designed in with confidence for automotive applications as well as other strenuous environments which ensures optimal quality and reliability.

Key Features

- Best in class low ESR
- Large capacitance
- Miniaturization
- More than 30 series available
- RoHs compliant
- AEC-Q200 complaint* (depends on series)
- Vibration proof type available* (depends on size)

Industry / Communication

- Measuring Instrument
- PLC
- Smart speaker

Automotive

- ADAS
- EPS
- BMS

Infrastructure

- Smart meter
- EV stand
- Base station
