10 AMP POWER RELAY

HP RELAYS

⚠ Product to be discontinued.

FEATURES

1. High-capacity and long life

Mechanical life is more than 10 million operations and, with electrical life of more than 200,000 operations (resistive load 10 A; inductive load 7.5 A), the relay has excellent inductive load durability.

2. Easy mounting and wiring

The terminal arrangement is apparent at a glance and wiring is easy. Moreover, quick tab terminal is also possible.

3. Operation indicator option

Optional operation indicators are available for easy visual confirmation that relays are operating. They simplify maintenance.

4. UL/CSA approved

5. Wide range of sockets and terminal sockets

To enable use with DIN rails, DIN terminal sockets are also available.

TYPICAL APPLICATIONS

HP relays enjoy wide use in various applications, particularly in automation controls and remote controls.

Applications include:

1. Industrial machinery

For controlling positioning, pressure, and temperature in molding equipment, boilers, pumps, charging pressure equipment, measuring and evaluation equipment, textile machines, etc.

2. Machine tools

Control of positioning and directional change in turning machines, lathes, borers, etc.

3. Food processing packing machines

Automatic control of packing equipment for milk and seafood, bottling, canning, and packaging

4. Office equipment

Control of copiers, time recorders, etc.

5. Coin operate machines

Control of food, cigarette, and other vending machines

6. Measuring devices and equipment

For repeating installation of control signals and in power amplifiers

7. Generators, transformers and power receiving equipment.

Functional parts in protective equipment, functional assistance in automatic adjustment equipment, telemeters and other remote monitoring equipment

8. Control of conveyance equipment

Control panels for elevators, escalators, and other conveyance equipment, control of all kinds industrial transport equipment such as conveyors.

9. Amusement equipment

Control of equipment in amusement parks, etc., control of bowling alley equipment, control of fountains in public parks

About Cd-free contacts

We have introduced Cadmium free type products to reduce Environmental Hazardous Substances. (The suffix "F" should be added to the part number. The Suffix "F" is required only for 4 Form C contact type. The 2 Form C and 3 Form C contact type is originally cadmium-free, the suffix "F" is not required.)

Please replace parts containing Cadmium with Cadmium-free products and evaluate them with your actual application before use because the life of a relay depends on the contact material and load.

Notes: 1. The rated current area is $\pm 15\%$ (60Hz) [AC coils], $\pm 10\%$ (20°C) [DC coils]

2. The coil resistance for DC operation is the value measured when the coil temperature is 20°C 68°F. Compensate $\pm 0.4\%$ for every $\pm 1^\circ\text{C}$ change in temperature.

3. The relay operates in a range of 80% to 110% V of the voltage rating, but ideally, in consideration of temporary voltage fluctuations, it should be operated at the rated voltage. In particular, for AC operation, if the impressed voltage drops to 80% V or more below the rated voltage, humming will occur and a large current will flow leading possibly to coil burnout.

4. For use with 200 V DC, connect a 6.7kΩ (10W) resistor, in series, to the 100 V DC relay [3 Form C type is .64kΩ (5W); 4 Form C type is .62kΩ (10W)].

5. As a general rule, only a pure DC voltage should be used for the coil drive.

However, a DC power supply that contains ripples has characteristics that differ from pure DC.

Therefore, please verify characteristics (operate voltage, release voltage, humming) using the actual circuit that will be used.

2. Specifications

Characteristics	Item		Specifications

	Vibration resistance	Functional	10 to 55 Hz at double amplitude of 1 mm (Detection time: 10μs.)
		Destructive	10 to 55 Hz at double amplitude of 2 mm
Expected life	Mechanical		Min. 10 ⁷
Conditions	Conditions for operation, transport and storage*3		Ambient temperature: -50°C to +40°C -58°F to +104°F Humidity: 5 to 85% R.H. (Not freezing and condensing at low temperature)
	Max. Operating speed		20 cpm (at max. rating)
Unit weight			2 Form C: approx. 60g 2.12oz, 3 Form C: approx. 100g 3.53oz, 4 Form C: approx. 125g 4.41oz

*1 This value can change due to the switching frequency, environmental conditions and desired reliability level, therefore it is recommended to check this with the actual load.

*2 For the AC coil types, the operate/release time will differ depending on the phase.

*3 The upper operation ambient temperature limit is the maximum temperature that can satisfy the coil temperature rise value. Refer to "6. Usage, Storage and Transport Conditions" in [AMBIENT ENVIRONMENT](#) section in [Relay Technical Information](#).

3. Electrical life**1) AC load**

	5	3	0.3	0.2	Min. 10 ⁶
	1	0.6	0.1	0.06	Min. 2×10 ⁶

Notes:

1. For DC inductive loads, use an arc suppressing circuit.

2. Cautions at DC load use: when used under a DC load operating at high repetition rate with considerable arcing, corrosion of the contacts and/or the contact blades is likely to occur.

4. Life of LED and neon lamp (with operation indication)

	Continuous	Use rating (ON time) 50%

NOTES

1. There are two types of HP relay: plug-in and direct mounting (HP2-TM and HP3-M only).

Avoid use of direct mounting types in sockets or terminal sockets.

Note: Mounting measurements for direct mounting types (HP2-TM and HP3-M) are shown in the drawing on page 7.

2. The terminals are compatible with tab terminals. Consequently, for direct mounting types, in addition to soldering, AMP terminals can be used.

Part number	Compatible tab terminal
HP2	#205 series
HP3	#187 series
HP4	#205 series

3. When tightening the fixing screws of direct mounting types, use washers to prevent damage or distortion.

The optimum torque range is 0.49 to 0.69 N·m, (5 to 7 kgf·cm).

To prevent loosening of direct mounting types, terminal sockets and sockets, etc., when fixing the screws, use spring washers, etc. Moreover, wiring (soldering), should be done with care while ensuring strong connections.

4. When tightening terminal socket fixing screws, to prevent damage, the optimum torque range should be 0.784 to 0.98 N·m, (8 to 10 kgf·cm).

5. Avoid use in adverse conditions, such as where the relay will be subjected to strong vibrations or shock, where there is exposure to harmful gas, or where ambient temperatures are high (more than 40°C).

6. Use in DC load

Abnormal wear of the contacts and contact springs will occur when the switching frequency is high and there are large arcs. In particular, if high-frequency operation in hot or humid conditions is intended, use arc-suppressing circuits.

7. There is no particular specification for HP relay mounting orientation.

8. Do not insert or remove relays into or out of live circuits.

For Cautions for Use, see [Relay Technical Information](#).
