## Panasonic

INSTRUCTION MANUAL
Manual Setting Fiber Sensor Amplifire FX-311 Series Thank you very much for purchasing Panasonic products. Please read this Instruction
Manual carefuly and thoroughly for the coroett and otpimum use of this product.

Kindy keep this manul $\square$| $\left.-\begin{array}{l}\text { Never use } \\ \text { protection. }\end{array}\right)$ |
| :---: |

- In case of using sensing devices for personnel protection, use products which meet standards, such as oshtal ANST or IIEC
etc., for personnel protection applicable in each region or etc., for personnel protection applicable in each region or
country.

## Zcautions

- This product has been developed / produced for industrial use only.
- Verify that the supply vortage variation is within the rating
- Take care that if a voltage exceeding the rated range is is. applied, or if an $A C$ power

Usciip ment to an an actual ground.
- If power is supplied from a commerial switching regulator, ensure that the frame
- ground (F.G.) terminal of the power supply is connected to an actual ground.
switched on. during the initial transient time ( 0.5 sec .) after the power supply is
-     - Take car
- Do not run the wires together with high-voltage lines or power lines or put them in
- Make sure to use the optional quick-c-onnection cable for the connection of the
amplifer. Extension up to total 100 m is possible with $0.3 m m^{2}$, or more, cable. amplifier. Extension up to total 100 m is possible with $0.3 \mathrm{~mm}^{2}$, or more, cable
However, in order to reduce noise, make the wiring as short as possible.
- This sensono is is ustitable force indoise, make
Avoid duse only.
- Avoid dust, diot and st stear.
- Take care that the sensor does not come in contact with water, oil, grease, organic

- $\begin{aligned} & \text { explosive gases. } \\ & \text { Never disassemble or modify the sensor }\end{aligned}$

## 3 MOUNTIN

How to mount the amplifier
(1) Fit the rear part of the mou
2) Press $35 m$ width DiN rail.
unit on the 35 mm width of din rail and fit the front part of
the mounting section to the DIN rail.
Push the amplifier forwart
2) Litt up the front part of the amplifier to remove it

Note: Take care that if the front part is litted without pushing the
amppifire otward, the hook on the rear portion of the mounting
secfion is is keld to
 How to connect the fiber cables
Be sure to fit the attachment to the fibers first before inserting the fibers to the
amplifier. For details, refer to the instruction manual enclosed with the fibers.

## 4 CONNECTION

Make sure that the power supply is off while connecting or disconnecting the
quick-connection cable. Connection method
(1) Holding the connector of the quick-connection cable, align
its projection with the groove at the top portion of the
projection with the groove at the top portion of the
(2) Insert the connector till a click is felt

Disconnection method
on at the top
Note: Take eare that if the connector is pulled out without pressing the

## CASCADING AMPLIFIERS

## 5 CASCADING AMPLIFIERS

- Make sure that the power supply is off while adding or removing the amplifiers.
- Make sure to check the allowable ambient temperature, as it depends on the
number of amplifiers connected in cascade.
In case two, or mid.
them on a alN rail.
- When the amplifiers move on the DIN rail depending on the attaching condition,
fititing them between the optional end plates (MSS-IN-E) mounted a t the two ends

 - Up to maximum 15 amplifiers can be a alded (total 16 amplifiers oonnected in cascade.) as the quick-connection cable for the second amplifier onwards.
The settings other than the interference prevention function cannot be transmitted
between this product and other digital fiber amplifiers. Therefore, in case both models of amplifiers are mounted in cascade, be sure to mount identical models
mogether For mounting and removing the amplifier, refer to 'B MOUNTING
Cascading method
(1) Mount the amplifiers, one by
one, on the 35 mm width DIN
rail and make them close each Iat and make them close each
other.
(2) Insert the connector of the
(3) Mount the optional end plates

3) Mount the optional end plates
(MSS-DIN-E) at both the ends
to hold the amplife bet

To hold the amplifiers between
theif flat sides.
(4) Tighten the screws to fix the (4) tight flat sides. sterews to fix the
Tend plates (MS-DIN-E). Dismantling
(1) Pressing the projection at the
top of the quick-connection cable, pull out the connector.
(2) Remove the amplifier.

## 7 PART DESCRIPTION

## Sensithir Mndicator Pointer part: Red backight

Stability indicator (Green)

## 

## Timer selection suvich

8 MODE SELECTION SWITCH
For FX-311(P), the most suitable sensing mode can be selected according to the application from LONG (long range distance), STD (standard) or S-D
(reduced intensity). Furthermore, for $\mathrm{FX}-311 \mathrm{P}(\mathrm{P})$ and $\mathrm{FX}-311 \mathrm{P}(\mathrm{P})$, the sensing mode can be selected from LONG (long range distance), STD
(standara) Make sure to carry out sensitivity adjustm
<FX-311 (P)>

| Mode |  | Application | Response |
| :---: | :---: | :---: | :---: |
| LONG |  | Used in case long distance sensing is required However, the response time is longer than in STD mode. | 2 ms |
| STD | $\begin{gathered} \text { LONG } \\ \text { STOD } \\ S-D \end{gathered}$ | Used for general sensing application. |  |
| S-D |  | Since the emitted light amount is restricted in this mode, it is suitable for delicate sensing, such as when the received light is saturated due to too short a sensing |  |

<FX-311B(P), FX-311G(P)>

| Mode | Mode selection <br> switch | Application | Response <br> time |
| :---: | :---: | :---: | :---: |
| LONG | $\begin{aligned} & \text { LONG } \\ & \text { SASTOTM } \\ & \text { FAST } \end{aligned}$ | Used in case long distance sensing is required. However, the response time is longer than in STD mode. | 2 ms |
| STD |  | Used for general sensing appication. | $250 \mu \mathrm{~s}$ |
| FAST | $\begin{aligned} & \text { LONG } \\ & \text { FASTO } \\ & \text { SAST } \end{aligned}$ | Used in case high speed sensing is required. | $150 \mu \mathrm{~s}$ |

| (5) Selecte ither L-ON (Light ON) or D-ON (Dark ON) according to your application. |  |  |  |  |
| Notes: 1) When 'assist function' is not used, the pointer does not flash. 2) When 'assist function' is not used, the middle point of $(\mathbb{A}$ and (B) is regarded as the optimum <br> 2) When 'assist function <br> 3) In order to protect the mechanism, the sensitivity adjuster idles when over turned, which <br> may result in a backlash of 1 to 2 divisions. <br> 4) Depending upon the sensing conditions, stable sensing may be possible at a position which is slightly shifted from the optimum sensitivity point. <br> 5) Do not move or bend the fiber cable after the sensitivity adjustment. Detection may become unstable. |  |  |  |  |

## 10 TIMER FUNCTION

- This product incorporates an OFF-delay timer function. The delay time can be selected as either 10 ms . approx. or 40 ans. approx. With the timer selection switch.
since the output is extended by a fixed period, it is useful when the connected
. device has a slow response time or when small objects are being sensed and the <Time chart>
